c. Test data was recorded and is available in sufficient quantity and detail to be interpreted by others in order to determine the presence of an identified limiting zone and average percolation rate. \_\_\_\_\_

**SECTION II ON-SITE VERIFICATION**

	Yes	No
6. Are there any observable conditions on the lot which would contradict the soils information provided? _____	_____	_____
7. Was the soil probe performed more than ten (10) feet from the proposed area? _____	_____	_____
8. Was the percolation test performed at a location other than the proposed area? _____	_____	_____

*IF ANY OF THE QUESTIONS ABOVE WERE ANSWERED "YES", RETESTING OF THE SITE IS REQUIRED.*
